SUMMARY

Aspiring Cyber Security and Cyber Forensics undergraduate with hands-on exposure to vulnerability assessment, secure system design, and web application security testing. Interested in strengthening system security through practical analysis of threats, secure development practices, and continuous learning in emerging cybersecurity domains.

EDUCATION

- **Srinivas University Institute of Engineering and Technology** 2023 – 2027
B.Tech – Cyber Security & Cyber Forensics CGPA: 9.65 (5th sem)
- **Vivekananda PU College, Puttur** 2023
Pre-University Course 97.5%
- **Vittal Jaycees English Medium School** 2021
SSLC (KSEEB) 99.36%

SKILLS

- **Programming:** Python, Java, C, JavaScript, Solidity
- **Web Development:** HTML, CSS, JavaScript, React.js, Node.js, MERN Stack
- **Databases:** MongoDB, MySQL
- **Developer Tools:** VSCode, Jupyter Notebook, Wokwi, LaTeX
- **Cybersecurity Tools:** Wireshark, Nmap, Burp Suite, SQLMap, John the Ripper, Hashcat, DVWA, OWASP Juice Shop
- **Soft Skills:** Communication, Leadership, Problem Solving, Quick Learner

INTERNSHIPS

- **Cyber Security & Ethical Hacking Intern — System Tron (Feb 2026)**
Performed vulnerability assessment and penetration testing focusing on OWASP Top 10 risks and secure coding practices.
- **Cyber Security & Blockchain Intern — CodTech IT Solutions (Feb 2026 July 2025)**
Developed blockchain smart contracts and decentralized applications using Solidity, Truffle, and Ganache.
- **Cybersecurity Intern — Zalima Development (Current)**
Conducting web application security testing and vulnerability assessments.

PROJECTS

Cybersecurity Projects

- **Machine Learning Intrusion Detection System with Windows Firewall (March 2026)**
Developed an IDS capable of classifying network traffic as normal or malicious using machine learning algorithms.
- **Blockchain Healthcare DApp (July 2025)**
Built a decentralized healthcare application using Solidity smart contracts with Ganache and Truffle framework.
- **OWASP Juice Shop & DVWA Security Testing (Feb 2026)**
Performed penetration testing on vulnerable web applications exploiting SQL Injection, Cross-Site Scripting (XSS), authentication flaws and other OWASP Top 10 vulnerabilities.

Development Projects

- **Portfolio Website (Oct 2024)**
Developed a responsive personal portfolio website using HTML, CSS and JavaScript.
- **Valentine's Interactive Website (Dec 2025)**
Created an interactive website with HTML,CSS and Javascript and deployed it through netlify to understand the working of hosting website.
- **Job Portal Web Application (Jan 2026)**
Developed a MERN stack job portal with authentication, dashboards and job listing features.
- **IoT Simon Says Game using ESP32 (March 2026)**
Designed and implemented an interactive Simon Says memory game using the ESP32 microcontroller.

ACHIEVEMENTS

- **Vice President — SATARC Cyber Security Student Association**
Leading cybersecurity related technical initiatives, awareness sessions, and student engagement activities within the university.
- **Vice President — Leo Club, SUIET**
- Participated in and won prizes in **Technical talks, debates, and public speaking competitions.**
- Organized and conducted multiple **technical and cultural events** at institutional level.
- Won **District-level prizes in singing, dancing, speech, and Yakshagana performances.**
- Completed **Vidwath examinations in Bharatanatyam** with over **200+ stage performances.**

CERTIFICATIONS

- Cisco Cybersecurity
- IBM SkillsBuild
- Infosys Springboard
- CodeRed Cybersecurity
- HP Life Professional Certifications
- NPTEL Cybersecurity Courses (Ongoing)
